**New material handling company, TREW, launches operations**

*Led by industry veterans with decades of experience in the material handling industry*

Mason, Ohio - TREW launched operations on January 1, 2019 to provide full-service material handling capabilities, including software, machine controls, conveyor, sortation, order fulfillment and other solutions. TREW, led by industry veterans CEO Mark Tefend, President & COO Chris Arnold and their team of experienced material handling leaders, is intent on forging lasting relationships with integrators and end-users seeking reliable, high-quality material handling innovation.

“With the material handling industry still growing, yet consolidation occurring among MHE providers, we saw space to provide a range of capabilities with intimacy and passion,” shares Mark Tefend, CEO. “All of us at TREW understand fully the challenges facing our integrators and customers. We are committed to preserving and enhancing our current offerings to meet material handling needs ranging from the simple to the complex.”

TREW is currently operating its headquarters in Mason, Ohio as it develops its physical expansion plans to house its expected growth. TREW’s products and services are represented by their integrator networks already established through Tech King Operations and Hilmot. TREW also has a large network of TREWFriends in the industry, comprised of consultants and OEMs who provide robotics, AS/RS, cranes, shuttle systems and other technologies, to complement and mutually leverage core strengths.

**About TREW**

TREW provides automated material handling solutions for integrators and end users, including Warehouse Execution Systems (WES), Warehouse Control Systems (WCS), PLC- and server-based machine controls, motorized driven roller (MDR) conveyor and services such as concepting, engineering, technical support, parts, field service and training. Serving the North American retail, warehouse, distribution, manufacturing and ecommerce industries, TREW’s experienced staff and broad network of integrator partners enable uncommonly smart solutions scalable to any material handling needs.
